

**TWAS CENTRAL & SOUTH  
ASIA REGIONAL PARTNER**

**(TWAS- CASAREP)**

## **At Jawaharlal Nehru Centre for Advanced Scientific Research, Bengaluru, India**

**Theme: Contribution of Chemistry and Physics towards  
Medical Sciences and the Global Health Care  
held online during 19-20 January 2023**

This meeting held online is to bring forth the importance of basic sciences in accomplishing Sustainable Development goals and motivate young scientists to take up innovative research. The contribution of chemistry and physics to the medical sciences is to highlight the impact of basic sciences to global healthcare. The deliberations in the meeting essentially underscore the importance of research contributions in basic sciences, chemistry and physics, to advancement of medical sciences and technologies. This Regional Chapter's meeting cover topics dealing with drug discovery for communicable and noncommunicable diseases, development of vaccination for pandemic diseases and advanced innovative medical technologies emanated from basic sciences including nanoscience to improve affordable global healthcare. Special emphasis is laid to tackling global mental health and wellness.

**Early career scientists below the age of 40 years including graduate students from Central and South Asian Region and other TWAS Regions are encouraged to register and a Special invitation for all the women scientists to actively participate in the meeting.**

**All can register online**
